Subject: Public Records Request: Brian Sullivan, Dave Somers, Eric Parks

RE: Public records request

Attn Ms. Bratcher and Ms. Isenberg:

Pursuant to the state open records act, **we write today to request records pertaining to county employees Brian Sullivan, Dave Somers and Eric Parks.**

Specifically, we request the following:

Telecommunication and Email Records (Date Range: October 1, 2011 to Present)

A. We request all telecommunication records pertaining to the listed individuals during the listed date range

For the purposes of this portion of the request, we seek the listed individuals' complete records pertaining to any and all of telecommunication devices and/or accounts or phone numbers used for county business by the listed individuals during the stated time period.

Examples of the types of records we expect to find include desk phone call histories, wireless bills, mobile device bills, MMS/SMS logs, itemized cellular billing records and call histories pertaining to county-issued cellular devices (example: iphones, ipads, blackberrys, etc). To be clear, we seek responsive records detailing the itemized logs pertaining to county-maintained office/desk phones and extensions regularly used by the listed individuals.

We request responsive records from non-county telecommunications (mobile or otherwise) accounts maintained or used for county business with respect to the listed individuals as well, if applicable.

B. Records of each listed individual's email account(s) activity during the listed date range

We request records of all email traffic connected to the listed individuals' county-maintained email accounts. We are aware that some of the listed individuals use multiple county-maintained accounts and possess multiple county email aliases. We respectfully request records of all accounts and aliases used by the listed individuals. Records of all sent, received, bcc'd, and deleted emails should be included. Further, we respectfully request that the email accounts be preserved and transmitted in PST/OST/Outlook data file format, with metadata retained. We request responsive email records from non-county accounts maintained or used for county business with respect to the listed individuals as well, if applicable.

Wherever possible, we request the records to be released in electronic format via email. In addition, we would appreciate the records to be released in installments, with the newest records released first and then working backward. Further, we request an exemption and redaction log should any records be withheld. Please contact us via email at publicrecords@blancsmanteaux.com should any problems or questions arise.

Thank you for your assistance in this matter.
